Distribute energy for a sustainable future

2i Rete Gas, while pursuing environmental protection and safeguard principles, is committed to **promoting and implementing initiatives to** ensure a sustainable evolution of the gas infrastructure in the medium to long term, the aim being to provide its support in establishing a new energy paradigm with reduced impact on the environment, by:

- promoting and implementing the transition process based on endeavours launched in several areas, including leveraging the gas infrastructure
 as a resource to support the integration of renewable sources and increase the efficiency of housing stock, also by adopting a commercial
 development model that prioritises the use of gas to replace more polluting fuels, supporting gas advocacy initiatives, pursuing advanced asset uses
 with a view to green objectives, as well as expanding its scope of operations in support of decarbonisation by submitting energy efficiency
 proposals;
- minimising the impact of its business operations on the surrounding environment through various initiatives, including the systematic identification of environmental risks and the effects of climate change, ensuring an appropriate control, as well as the quantification to progressively reduce energy consumption and direct impacts such as, for example, waste, atmospheric CO₂ emissions and fugitive CH₄ emissions from the infrastructures managed;
- protecting biodiversity, assessing whether additional safeguards should be put in place over and above the protection already provided by legislation.

Create shared value

In its relations with **stakeholders**, 2i Rete Gas strives to act as a competent, reliable and focused partner. A partner who places at the core of its management practices the pursuit of **operational excellence** and the **ability to pick up and carry through the challenges faced by the industry**, providing practical answers to specific needs as a way to contribute to the development of the local areas in which it operates, and is driven by a fully supportive spirit and an approach geared towards the creation of long-term shared value, by:

- collaborating with public Institutions and Authorities, putting its know-how at their service through participation in consultation procedures aimed at
 addressing and outlining future governance strategies for the energy sector that will generate increasingly effective and efficient impacts for the
 local communities;
- implementing activities that contribute to generating positive impacts for the communities served by the network, including pursuing ever higher levels of technical and commercial quality while, at the same time, seeking a reduction in operating costs eligible for cut-back, the underlying goal being to return value to the community through a safe, uninterrupted, reliable and timely service, as well as a lower incidence of the distribution service cost reflected in the bill according to industry regulations;
- continuing to develop dialogue channels and tools, as well as listening initiatives designed for its clients and monitoring their satisfaction levels;
- managing the supply chain based on ethics, transparency and the creation of mutual value.
